EXPERIENCE

Freelance Software Developer

MAY 2019 - PRESENT

As a Freelance Software Developer, I have been designing and developing modern web applications, with a focus on user interface design, responsive layouts, and seamless API integration.

Full Stack Developer - Serenity Youth Development Inc. (Contract)

JUL 2025 - PRESENT

- Architected and deployed a comprehensive sports assessment platform, digitizing traditional paper-based evaluations for baseball and basketball programs, serving 100+ youth athletes
- Engineered a responsive React application with Tailwind CSS, Firebase/Firestore integration, and real-time data synchronization, reducing assessment processing time by 75%
- Developed an advanced PDF generation system using @react-pdf/renderer with sport-specific branding, photo integration, and automated report generation, eliminating manual paperwork
- Implemented player management features, including search/lookup functionality, team analytics with statistical calculations, and photo upload capabilities with Firebase Storage and CORS configuration
- Delivered production-ready solution with Firebase Authentication, role-based access control, and automated deployment pipeline to Firebase Hosting

Frontend Developer - Equity & Engagement Consulting, LLC (Contract)

APR 2021 - MAY 2021

- Designed and developed a fully responsive website from the ground up using HTML, CSS, and JavaScript, ensuring cross-browser compatibility and a seamless user experience.
- Outlined design and user experience (UX) strategy, focusing on clean navigation, accessibility compliance (WCAG), and mobile responsiveness to enhance engagement.

Sigma Defense Systems LLC, Remote — Software Engineer II

NOV 2020 - OCT 2024

As a Software Engineer II, I worked on process automation using GitLab pipelines and building operating system containers. I've also built and maintained many React and JavaScript components.

- Developed and maintained React.js features for enterprise applications, improving performance and scalability.
- Optimized application state management using React Hooks and Redux, reducing UI latency by 30%.
- Built and maintained CI/CD pipelines in GitLab, automating linting, testing, and vulnerability scans to improve release reliability.
- Implemented automated security workflows and container hardening processes, reducing false positives by 40% and improving overall platform security.
- Conducted vulnerability assessments and optimized RedHat-based container images, reducing deployment time by 20%.
- Designed frontend improvements using React, JavaScript, and TypeScript, collaborating with backend teams to integrate APIs and improve data flow.
- Developed schema validation and quality checks across large codebases to maintain system reliability and prevent regressions.
- Served as Scrum Master, facilitating sprint planning, backlog grooming, and cross-team collaboration to align engineering work with business priorities.
- Maintained developer documentation and supported onboarding to improve knowledge sharing and team productivity.

EDUCATION

Drexel University,

Philadelphia, PA —

Graduate Certificate, Web

Application Development

JAN 2025 - DEC 2025

Drexel University,

Philadelphia, PA — M.S.

Human-Computer

Interaction & User Experience

JAN 2024 - DEC 2025

Hampton University,

Hampton, VA — B.S.

Computer Science

AUG 2014 - MAY 2019

SKILLS

Programming Languages:

Python, JavaScript, Go, Java,

Bash, HTML, PHP, YAML,

TypeScript

Frameworks:

 React, Node,

React Native, Angular

Platforms:

 Docker,

Terraform, Ansible, AWS,

Kubernetes

Web Applications:

 Git,

Figma, Canva, Jira,

Confluence, WordPress,

SharePoint, Shopify

Databases:

 MySQL,

MongoDB

Methodologies:

 Agile

(Scrum), CI/CD, Kanban
